COURSE CODE: **B302_1**

Business models in strategic management

https://www.open.edu/openlearn/money-business/business-models-strategic-management/content-section-0

Course summary

In this free course, Business models in strategic management, you will be introduced to the theory and practice of business models as they have developed in strategy literature. In particular, you will explore the emergence of the business model idea, types of business models and how business models can be designed. Inherent in this course is the idea that, despite being more frequently used in business, business models are not limited to the business context. Neither are they meant for strategic planning in organisations only. Rather they may have wider applications in our lives. For instance, you will see how they can be applied to build strategies of your professional development and career growth.

Learning outcomes

By completing this course, the learner should be able to:

- recognise how to distinguish among, and make use of, different types of business models
- understand how to build a business model by using a business model canvas tool
- develop a business model canvas for professional development and career growth.

Completed study

The learner has completed the following:

Section 1

The emergence of the business model idea

Section 2

Types of business models

Section 3

E-commerce business models

Section 4

Designing business models

Section 5

Using business models in your life
